

# Mobile Support Facilities

## Disaster and Emergency Solutions

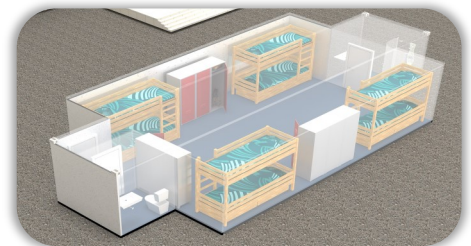

Emergency planning and management have become more frequent in today's evolving global environment. Whether it is a natural disaster or a local emergency, preparedness and response are crucial to protecting the people and its community. In an emergency, many amenities may not be available or operational, and temporary facilities become the course of action. Our versatile mobile expandable units are a solution to providing support facilities in emergency circumstances.

The units are manufactured to support various applications. Fully customisable and equipped, they are self-contained facilities that range in different sizes and offer the ease of on-site services in cities and remote locations. With hydraulic expandable sides, auto-lifting and self-leveling systems, these mobile facilities are spacious and can be quickly deployed to operate and serve the community.

### Applications include:

- Command/Operations Centres
- Information/Counselling Centres
- Healthcare Centres, Multi-Clinics, Field Hospitals
- Temporary Living Facilities/Shelters
- Kitchens/Eatery Facilities
- Restrooms/Shower Facilities

Geoform Canada is a Canadian distributor of specialty products including expandable mobile trailers and containers. We collaborate with Optima Technic, a reputable engineering company with over 20 years of experience in designing, manufacturing and delivering mobile solutions to private and public organizations such as the United Nations, and Red Cross. Our focus is to provide high-quality, affordable solutions based on customers' needs and their application requirements.
